

Memo to Family on Loss of Rights

my memo to each of my family members who were hysterically envisioning my possible life-threatening activities in their over-wrought brains. none of the activities they wildly feared were on my "to-do list."

as the dust has settled and i am realizing the totality of "Rights" my family has over me, and my lack of "Rights" to escape my family's meddling in my life, and the great wars this country is fighting to "spread democracy" - a democracy few citizens are allowed -- i am repelled.
